## PROFESSIONAL EXPERIENCE

---

### Mid-level Software Engineer (Team Lead)

Dec 2021 – Present

#### PearlPay, Inc.

Makati City, Metro Manila

- Maintained high level of engineering standard as one of the 5 Team Leads, mentored 14+ Interns, 6 Jr Dev Trainees, and 5 Devs
- Performed weekly code reviews covering around 6 PRs on average, facilitated internal training and demos, and documented technical decisions
- Conducted technical interviews with 11 Dev applicants increasing team headcount by 1 Mid-level Dev and 3 Jr Devs which then produced more tasks and features delivered
- Investigated critical prod issues and came up with quick feedback or fixed the issues within a few minutes to hours at best, led prod support and log monitoring on one live product in the production environment, and cloud deployment to 20+ AWS environments

### Software Engineer

Apr 2021 – Nov 2021

#### PearlPay, Inc.

Makati City, Metro Manila

- Accelerated migration of high-loads of data from client's legacy system into the system with processing time reduced from hours to a few minutes by processing data in batch
- Delivered High Priority features for weekly endorsements to the client before the product went live
- Strengthened server security by patching critical vulnerabilities having 0 incidents of intrusion
- Engineered time-sensitive and complex product features like job schedulers and database syncing features; Finishes 5 to 6 tickets per sprint at best

### Software Engineer

Feb 2020 – Mar 2021

#### Orange and Bronze Software Labs, Inc.

Makati City, Metro Manila

- Received overall highest client's performance review scores of 9+ throughout company history twice
- Overhauled server issues by patching two critical vulnerabilities, thus preventing possible exploits
- Improved features with data retrieval from database usually from ~1 minute to 3–4 seconds

### Research and Development Engineering Intern

Jun 2017 – Jul 2017

#### Primary Software Development Corporation

Cebu City, Cebu

- Modernized workflow by introducing three new tools to the developer team
- Praised by Head of Engineering for demonstrating to dev team productivity gains of using the 3 tools
